

# AFZAL AHMED SIDDIQUI

Aspiring Data Scientist | Analytical Problem-Solver | Machine Learning Enthusiast

ahmedd.afzall@gmail.com • <https://github.com/Ahmed-Afzall> • (+91) 8962158306 • BHOPAL, M.P

## Summary

Passionate about transforming raw data into actionable insights to solve complex problems and drive data-informed decisions. Proficient in applying advanced analytics, machine learning techniques, and statistical modeling to uncover patterns and trends across diverse datasets. Eager to contribute to impactful projects in a dynamic, collaborative, and innovation-driven environment. Motivated to leverage data science expertise to deliver measurable outcomes and support strategic decision-making processes.

| <b>Anonymization: Protecting Identities in Datasets</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Bhopal<br>08/2024 - 11/2024 |
| Developed a secure data anonymization system for encrypting sensitive information (phone numbers, emails) in large datasets. Implemented field-specific encryption, robust key management, and automated key distribution via email, ensuring data privacy and compliance with Indian regulations DPDP Act, 2023. Designed for scalability, usability, and real-world integration, with extensive testing for accuracy and security.                                                                                                                                                                                                                                           |                             |
